

# Story Point Estimation Cheatsheet

## Fibonacci Scale Reference

1	2	3	5	8	13+
<b>Trivial</b> Fix typo, update config	<b>Small</b> Add simple validation	<b>Small-Med</b> New form field	<b>Medium</b> API integration	<b>Large</b> User auth flow	<b>Very Large</b> Split this story

### Ask Before Estimating

- How complex is this technically?
- Any dependencies on other teams?
- How clear are the requirements?
- What testing is needed?
- How does this compare to our baseline story?

### Red Flags — Don't Estimate Yet

- ✗ No acceptance criteria defined
- ✗ Team doesn't understand 'done'
- ✗ Missing technical decisions
- ✗ Unresolved external dependencies
- ✗ Story is larger than 13 points
